Ideation Phase

Brainstorm & Idea Prioritization Template (Adapted for HematoVision)

Date	27 FEBRUARY 2026
Team ID	LTVIP2026TMIDS79391
Project Name	HematoVision: Advanced Blood Cell Classification Using Transfer Learning
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.It looks like you've provided the title of a research paper:

1

"new brainstrome for HematoVision: Advanced Blood Cell Classification Using Transfer Learning"

If you'd like me to "convert" this, here are a few ways I can rephrase or summarize it, depending on what kind of conversion you are looking for:

1. **Simplified/Layman's Title:** A breakthrough idea for improving the accuracy of blood cell diagnosis using existing AI models.

2. **Focus on Method (Technical):** Novel Transfer Learning Approach for Enhanced Blood Cell Image Classification in the HematoVision System.

3. **Focus on Application:** Using a New Deep Learning Strategy (Brainstrome) to Improve Automated Blood Cell Analysis.

4. **A concise summary of the topic:** The paper introduces a new conceptual framework ("brainstrome") to enhance the HematoVision system's ability to classify blood cells precisely by leveraging the power of transfer learning.
